

# Team Kanban Maturity Chart

**Visualize Work** - How well does the team consistently use visualization tools to make the flow of work through the system visible?

**Limit WIP** - Does the team set WIP limits and use them as a tool for managing flow? Do they review WIP limits, adjust them, and respect them (which is not the same as blindly obeying them)

**Manage Flow** - How well does the team consistently observe the flow of work using relevant measures as guides in a continuing process of reducing waste, variability, and improving the flow of work through the system?

**Explicit Policies** - Does the team make policies relevant to the handling of tasks clear and explicit and review those policies as needed?

**Improve Collaboratively** - How well does the team use models and experiments to test ideas in order to introduce improvements to the process?

**Feedback Loops** - How well does the team create feedback loops to give both the team and individuals actionable feedback on quality and process?
